HOSE VAN

System - P20200

Almost all pollution response systems involve hoses of some type. The Hose Van P20200 contains 2-inch, 3-inch, 4-inch, and 6-inch diameter hoses in sufficient quantities to meet the suction and discharge needs of a large-scale oil spill operation. The quantities packaged in the primary response systems are normally adequate for first response; however, on large operations, additional hose or replacement hose is always required. Having these additional hoses readily available allows operations to continue if problems arise. See SPECIFICATIONS section of the Hose Supply and Support Van VA0120 for type and quantity of hose supplied with the system.

ESSM - VA0120 VAN, HOSE SUPPLY AND SUPPORT

The Hose Supply and Support Van VA0120 contains 2-inch, 3-inch, 4-inch, and 6-inch diameter suction and discharge hoses in sufficient quantities to meet the suction and discharge needs of a large scale oil spill operation. The need in the field to repair and replace hose is a constant problem, so additional hose or replacement hose is usually required. Having these additional hoses readily available allows recovery operations to continue if problems arise. See SPECIFICATIONS section for type and quantity of hose supplied with the Hose Supply and Support Van VA0120.
