800-GPM 3-Inch Diesel Trash Pumping System S18210

S0300-BV-CAT-010

PUMPING SYSTEM, TRASH, 3-INCH DIESEL, 800-GPM

System - S18210

The 3-Inch Diesel Trash Pumping System S18210 consists of two lightweight, diesel driven, centrifugal pumps, two spare parts kits, and an ancillary set. The pumps are capable of handling debris up to about 1 1/2 inches in diameter with a combined flow rate of 800 gpm. Protective cages surround the engine and pump assemblies, providing protection during shipping, use, and storage. The units have wheels and can be pushed or carried by two personnel. The ancillary set (wire mesh container) is used for storage and shipping of the pumps and spare parts kits. The ancillary set also consists of suction and discharge hoses, various fittings, clamps, nipples, and additional items necessary to support system operation. The 3-Inch Trash Pumps can be used for dewatering, counterflooding, or any other application where water must be pumped.

NOTE: The system is NOT configured to pump petroleum products from a stranded vessel.

Performance Curve for 3" Trash Pump PU0330

The 3-Inch Trash Pump PU0330 is a portable, diesel driven, self-priming, centrifugal pump designed to pump sludge, water, and debris (up to 1 1/2-inch diameter) at a flow rate of 400 gpm. The engine and pump are mounted in a wheeled, protective cage that includes lifting handles. The maximum suction lift of the pump is approximately 25 feet above the water surface. The pump is shipped in the wire mesh container of the Ancillary Set PU0235.
