KIT, SALVAGE BATTLE DAMAGE REPAIR SYSTEM (T-ARS)

System - S33100

The Salvage Battle Damage Repair Kit (System S33100) is used for emergency field repairs of minor damage to the hull plates of vessels. The tools, equipment, and materials in the Salvage Battle Damage Repair Kit KT3000 are used to cover and/or protect the damaged areas (i.e., holes, ruptures, or gashes) with a field-applied patch to prevent wind or fluids from entering into a compartment and/or hull until permanent repairs can be made.

## ESSM - KT3000 KIT, SALVAGE BATTLE DAMAGE REPAIR (T-ARS)

Salvage Battle Damage Repair Kit KT3000

The Salvage Battle Damage Repair Kit KT3000 provides the tools, equipment, and materials required to make emergency repairs to vessels that have acquired hull damage such as hull plate holes, ruptures, gashes, and weld joint failures. These materials can be used to make field repairs quickly to prevent wind and/or water from entering an area or compartment on the vessel. The Salvage Battle Damage Repair Kit also can prevent the vessel from being flooded with water and possibly sinking before it can reach a port, dock, pier, or dry-dock where permanent repair can be performed.

### Specifications

Type	Description	Qty
